NHU Without head-up display
NTB Without tow bar

About this report. It shows how the vehicle was specified when it left the factory. It does not show the vehicle's current condition, and it does not show anything changed, removed, retrofitted or added by a dealer or owner after it was built.

List prices are the manufacturer's published prices for each option when the vehicle was new. They are not a valuation and do not show what any option adds to the vehicle's value today.

Option prices and standard equipment come from the closest matching version in a price list, which may differ from the exact version of this vehicle. The build record is the manufacturer's own data. The data is supplied by third parties and MotifyMe® cannot guarantee that it is complete or free from error. Always check the vehicle itself before you buy.

This is not a vehicle history check. It does not cover outstanding finance, write-off or stolen records. For those, order a paid vehicle history check, with data provided by Experian, at motifyme.co/vehicle-check.
